

We are looking for tutors - Engineering Mechanics II

The Institute of Engineering Mechanics, Chair of Continuum Mechanics, is looking for motivated students to work as tutors for the Engineering Mechanics course.

Responsibilities include assisting students during weekly tutorial sessions with interactive review of lecture content using examples. In addition, the role may involve to holding consultation hours, assisting the lab courses, correcting submitted homework and running colloquia.

Successful completion of the Engineering Mechanics I and Engineering Mechanics II exams is required. In addition, you should enjoy mechanics and have an interest in teaching.

We offer a friendly and stimulating working environment as well as an insight into the field and ongoing research activities. In cooperation with the Department of Mechanical Engineering and the KIT Personnel Development Service (PEBA), you will have the opportunity to participate in a certified tutor training program.

If you are

- interested in Engineering Mechanics
- want to deepen your basic knowledge of Engineering Mechanics,
- would like to participate in a certified tutor training and prepare for your BSc thesis at ITM or a research activity,

We look forward to your application!

Application procedure:

Please send your application by 15 March 2025.

Hourly rate for Hiwi/Bachelor: **EUR 13.98**

Interested applicants are asked to send their CV and transcript of records to tutoren.tm2@itm.kit.edu. Questions can be directed to Dr Langhoff at tom-alexander.langhoff@kit.edu
